

PROTECTION & CRITICAL INFRASTRUCTURE

We take pride in being one of the region's most specialized security service providers. Our expertise in high-risk environments and industry-specific security solutions has enabled us to excel in the oil and gas sector while also earning the trust of prestigious diplomatic entities, including foreign embassies and consulates.

Our robust management system, backed by three internationally recognized accreditations—ISO 9001 (Quality Management), ISO 18788 (Security Operations Management), and ANSI/ASIS PSC-1:2022 (Private Security Company Standards)—ensures that our services meet the highest global standards. These certifications reinforce our commitment to precision, accountability, and continuous improvement, positioning us as a premier security provider. What truly sets us apart is our exclusive market specialization in the oil and gas industry, where our security solutions are tailored to the unique challenges of protecting oil rigs, wells, blocks, and refineries. By combining industry-leading expertise with cutting-edge security measures, we provide an unmatched level of protection for critical energy infrastructure, ensuring operational continuity in even the most challenging environments.

THE CRITICAL IMPORTANCE OF OIL & GAS ASSET PROTECTION IN KURDISTAN

The Kurdistan Region of Northern Iraq plays a strategic role in global energy production, making oil and gas asset protection a top priority for both local and international stakeholders. Given the region's geopolitical sensitivities, operational challenges, and evolving security threats, the protection of oil fields, refineries, and distribution networks is essential for maintaining economic stability and energy exports. Any disruption—whether due to sabotage, theft, terrorism, or operational hazards—can have far-reaching consequences on regional and global markets. At Black Wolf Security, we understand these challenges and provide uncompromising, 24/7 protection to secure investments, maintain workforce safety, and ensure the uninterrupted flow of energy. With our industry-leading expertise and elite security measures, we are the trusted partner in safeguarding Kurdistan's vital oil and gas assets against emerging threats.

SPECIALIZED SECURITY FOR THE OIL & GAS INDUSTRY

At Black Wolf Security, our sole specialization in oil and gas security sets us apart from conventional security firms. Unlike generalized security providers, we have developed highly tailored protection strategies designed specifically for the complex, high-risk nature of oil and gas operations. This focused expertise allows us to anticipate and mitigate industry-specific threats, from operational disruptions to geopolitical instability. Our deep understanding of energy infrastructure security ensures that our clients receive the most effective, field-tested protection, minimizing risks and maximizing operational continuity. By dedicating our resources exclusively to this sector, we deliver unmatched reliability, precision, and efficiency in securing vital assets that power economies and global markets.

Black Wolf Security provides specialized protection for every critical component of the oil and gas supply chain. Our security solutions cover oil wells, drilling rigs, exploration sites, production facilities, pipelines, refineries, and transportation networks, ensuring seamless security from extraction to distribution. We secure storage facilities, export terminals, offshore platforms, and remote field operations, where logistical challenges and security threats demand expert-level risk mitigation strategies. Additionally, we safeguard corporate offices, workforce accommodations, and operational command centers, ensuring that every link in the energy production cycle remains protected. With the growing demand for safe and efficient energy production, our specialized teams offer comprehensive security solutions tailored to meet the dynamic challenges of this critical industry.

BLACK WOLF'S CRITICAL SERVICE INFRASTRUCTURE

At Black Wolf Security, we provide a comprehensive suite of specialized security services designed to meet the unique demands of high-risk environments, particularly in the oil and gas industry and diplomatic sectors. Our Access Control, Static Protection, and K9 Services ensure that only authorized personnel enter critical sites, while our Close Protection Officers, FULL PSD Teams, and PSD Team Leaders/Shift Leaders offer elite-level security for high-profile individuals and operations. We enhance mobility security with Armed Drivers, Journey Management, and Travel Security, ensuring safe transportation across complex terrains. Our Erbil & Duhok Based Support Centers and Communication Centers serve as operational hubs, providing real-time intelligence and coordination for seamless security management. Additionally, we offer strategic consulting and pre-operation services, including Site Surveys, Risk Assessments, and HEAT (Hostile Environment Awareness Training), to prepare personnel for potential threats. Our Defensive Driving Training (DDT) further reinforces safety on the move, equipping teams with advanced evasive and defensive driving techniques. With a proven track record of securing high-risk assets, Black Wolf Security remains the trusted leader in tailored security solutions.
